

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A pimple removal utensil comprising:

a holder; and

a pressing portion ~~having in which~~ a first extension and a second extension ~~are formed~~, which correspond to each other and are branched off and extended from the holder, and ~~including a ring-like~~ pimple insertion hole formed inward ~~of~~ the first and second extensions,

wherein a bottom of the pressing portion is formed of a convex curved surface.

2. (Currently Amended) The pimple removal utensil of claim 1, wherein a number of indents including a number of grooves and a number of protrusions are formed on [the] inner contacting surfaces of the first and second extensions, in a corresponding ~~unevenness uneven~~ shape.

3. (Canceled)

4. (Currently Amended) The pimple removal utensil of claim 1, wherein [the] ~~an~~ interval between the first and second extensions becomes narrow gradually as it reaches from the insertion hole to ~~the end ends~~ of the first and second extensions.

5. (Previously Amended) The pimple removal utensil of claim 1, further comprising an auxiliary grip formed in the perpendicular direction from the holder.

6. (Currently Amended) The pimple removal utensil of claim 1, further comprising a ball-shaped ball-shaped massage ball having a smooth surface formed on [the] an upper portion of the holder.

7. (Canceled)

8. (Currently Amended) The pimple removal utensil of claim 2, wherein [the] an interval between the first and second extensions becomes narrow gradually as it reaches from the insertion hole to the end ends of the first and second extensions.

9. (New) A pimple removal utensil comprising:

a holder; and

a pressing portion having a first extension and a second extension, which correspond to each other and are branched off and extended from the holder, and a pimple insertion hole formed inward of the first and second extensions,

wherein a plurality of grooves and a plurality protrusions are formed on inward surfaces of the first and second extensions, wherein the grooves and the protrusions are formed in a pattern such that a gap between the inward surfaces of the first and second extensions becomes narrow gradually as it extends from the insertion hole to ends of the first and second extensions.

10. (New) The pimple removal utensil of claim 9, wherein a bottom of the pressing portion is formed of a convex curved surface.

11. (New) The pimple removal utensil of claim 9, wherein the pimple insertion hole is formed in a ring-like shape.

12. (New) The pimple removal utensil of claim 9, further comprising a ball-shaped massage ball having a smooth surface formed on an upper portion of the holder.
